UNIT 3 · TOPIC 3.3 · CULTURE LAB

GLUE OR WEDGE?

LAB WORKSHEET

Does culture hold a country together, or pull it apart?

TEACHER CREDIT

Name _____ **Partner** _____ **Period** _____

START HERE · TWO FORCES

GLUE

CENTRIPETAL

Remember: flower petals. Flowers bring people together.

A centripetal force **pulls people toward the center**. It unites a country. Examples: a shared language, a shared religion, a national team.

WEDGE

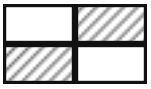

CENTRIFUGAL

Remember: the FU says it all. It pushes people away.

A centrifugal force **pushes people away from the center**. It divides a country and can lead to separatism, which means a group wants its own country.

STACK (reinforcing): language, religion, and identity all split in the **same place**. Usually a wedge.

CROSS (cross-cutting): the lines **cross**, so people who differ in one way share something else. Usually glue.

Directions: 1. Open the lab with your partner. 2. For each case, answer A to D in order: Read, Map, Street, Verdict. 3. Answer the Compare question after each matchup. Pace: about 4 minutes per country. Circle letters: L = Language, R = Religion, I = Identity, G = Glue, W = Wedge, N = Neither.
